

UNWELL

ANAESTHETIC

About Us

Anaesthetic is a Polish video game studio based in Wrocław, founded in 2023, specializing in the development and publishing of games with a strong focus on the human psyche, emotions, and dark atmospheres.

The studio strives to awaken human potential by shedding light on a phenomenon described as "The Gray" - symbolizing a sense of stagnation in everyday life and driving the search for meaning.

Currently, the team is developing a horror game titled Unwell.

UNWELL

UNWELL

UNWELL stands out with engaging survival horror gameplay. It is an experience created not only to evoke fear, but to leave the player questioning their own humanity long after the credits roll.

Inspired by Silent Hill and Darkwood, it combines the tension of classic horror with a metaphysical journey through emotions, traumas, and hidden aspects of the personality.
Gabriel awakens in a surreal world of his own psyche, where every location represents a different state of consciousness, and the monsters he encounters are reflections of his inner conflicts.

The player must fight for survival, manage limited resources, and make decisions that will determine whether the protagonist rejects, destroys, or accepts himself.

“Wake humanity potential by putting the gray to slumber”

"Both of us victims of the same twentieth-century plague. Not the Black Death, this time; The Gray Life." - Aldous Huxley

Scrolling through social media in an overstimulated "Gray Life," we trade the authentic experience of everyday life for an escape from the gray.
Our Team's mission is to awaken the human mind.
